PROJECTS

1- E-Commerce

E-Commerce site Responsive on all devices is a sale and purchase. you can publish the product you want to, but must approve the administrator of the product to be displayed on the site also you can modify and delete easy you want There are also services provide easy communication with Owner by request a friend send to the owner of the product and then accept and start a process of conversation with the seller to agree on Details necessary for the purchase process and there is also a contact form to communicate with the administrator and report any problem

and there is also a full control panel to control the site

- Technological used: HTML,CSS, JQuery, Bootstrap, wow.js , PHP, MVC, Laravel Framework and Socket, Ajax.

2- Hayatak

Hayatak: it's a professional website that represent several and different topics in all fields whatever it is scientific or for entertainment.it provides registration supported with login panel. It allows the user to share their topics on social media websites such as Facebook, google, Twitter...etc. Hayatak website is so useful with simple, easy and well-organized categories that shows over 1000 topic without confusing the user by classifying the topics into one of several categories. It allows the user to add topics under the approval of the admin. It also provides the user with the needed data of the number of views , comments ...etc. For admins, it includes a dashboard and control panel the helps the admins to know the interaction between the users and to accept or to refuse the activities on the site which keeps it under his control.

3- three responsive template

Design three templates Responsive on all devices
